UniZy Master Product Plan

1. Product Identity

UniZy is a student-centered multi-service platform for university students in New Assiut.

It combines daily student needs into one ecosystem:

- **Student Housing Brokerage**
- **Transportation Services**
- **Delivery Services**
- **Local Deals & Services**
- **Student Hub**
- **Meals**
- **Rewards & Loyalty**

The platform should function as:

- A **student utility app**
- A **merchant/provider marketplace**
- An **operations dashboard**
- A **community platform**
- A **service and support layer**

---

2. Core User Types

The app should support these user roles from day one:

A. Student User

The main customer.

Can browse, order, request, book, pay, earn points, and interact with the platform.

B. Housing Provider

Landlords, brokers, property managers, dorm operators.

C. Driver / Rider

Transport drivers and delivery riders.

D. Merchant / Service Provider

Restaurants, cafes, shops, laundry, printing, gyms, barbers, local businesses.

E. Meal Partner

Canteens, meal prep providers, student food vendors.

F. Support Agent

Handles tickets, complaints, moderation, refunds, escalation.

G. Operations Admin

Runs dispatch, approvals, listings, pricing, order oversight.

H. Super Admin / Owner

Full control over business settings, finance, analytics, permissions, growth tools.

I. Campus Ambassador / Referral Partner

Optional role for student promoters, affiliates, and community growth.

---

3. Main App Structure

UniZy should be designed as one platform with these major sections:

1. **Authentication & Onboarding**
2. **Home / Dashboard**
3. **Housing**
4. **Transport**
5. **Delivery**
6. **Deals & Local Services**
7. **Meals**
8. **Student Hub**
9. **Rewards / Wallet**
10. **Orders / Bookings / Requests**
11. **Messages / Notifications**
12. **Support**
13. **Settings / Account**

Plus separate interfaces for:

- **Admin Panel**
- **Driver / Rider Panel**
- **Housing Provider Panel**
- **Merchant / Meal Partner Panel**
- **Support / Moderation Panel**

---

4. Student App — All Main Pages

A. Splash / Launch

- Logo
- Tagline
- App loading state
- Optional campus-specific branding

B. Welcome / Intro Slides

- What UniZy offers
- How rewards work
- Safety / trust promise
- Student-only benefits

C. Sign Up

Fields:

- Full name
- Mobile number
- Email
- Password
- University

- Faculty / college
- Academic year
- Gender (optional)
- Referral code (optional)
- Agree to terms / privacy

D. Login

- Email / mobile login
- Password
- OTP login option
- Forgot password

E. OTP Verification

- SMS / WhatsApp / email verification
- Resend code

F. Profile Setup

- Profile photo
- Preferred language (Arabic / English)
- Preferred payment method
- Saved addresses
- Emergency contact

- Student ID upload (optional/for trust)
- Gender preference for transport/housing filters if needed

G. Home Page

This should be the main smart dashboard showing:

- Search bar
- Quick access cards:
    - Housing
    - Transport
    - Delivery
    - Deals
    - Meals
    - Hub
- Active bookings/orders
- Reward points summary
- Current offers
- Recommended services
- Announcements
- Support shortcut
- Recently used services

H. Global Search Page

Search across:

- Housing listings
- Restaurants / meals
- Deals
- Services
- Merchants
- Categories
- Hub posts (if enabled)

Filters:

- Category
- Area
- Price
- Rating
- Availability

---

5. Housing Module

Student Housing Pages

A. Housing Landing Page

- Featured listings
- Near campus

- Budget options
- Female-only / male-only / mixed filters
- Entire unit / room / shared bed filters
- Safe verified badge

B. Housing Search Results

Filters:

- Price range
- Distance to campus
- Room type
- Furnished/unfurnished
- Utilities included
- Gender preference
- Number of roommates
- AC / WiFi / kitchen / washing machine
- Verified only
- Available now / future move-in

C. Housing Listing Details

Must include:

- Photos gallery
- Title
- Monthly rent

- Deposit
- Brokerage/service fee
- Address / area
- Distance/time to campus
- Map
- Description
- Amenities
- Rules
- Gender restrictions
- Availability date
- Landlord/provider info
- Rating/reviews
- Report listing
- Save to favorites
- Request viewing
- Request booking / interest form
- Chat with provider / via UniZy relay

D. Book Viewing Form

Fields:

- Preferred date
- Preferred time

- Number of attendees
- Contact number
- Notes

E. Housing Interest / Request Form

Fields:

- Desired budget
- Move-in date
- Preferred area
- Room type
- Gender
- Number of roommates acceptable
- Furnished yes/no
- Notes

F. Saved Listings

- Wishlist
- Compare listings

G. My Housing Requests

- Viewing requests
- Booking requests
- Status timeline

- Provider response
- Cancellation

H. Compare Listings Page

- Rent
- Deposit
- Utilities
- Distance
- Amenities
- Rules
- Rating

I. Housing Reviews

- Review provider
- Review property
- Report fraud / misleading info

---

6. Transport Module

This should support both **scheduled** and **on-demand** transportation.

Student Transport Pages

A. Transport Landing Page

Service options:

- Ride now
- Schedule ride
- Shared ride
- Campus shuttle (if later)
- Intercity ride
- Female-preferred ride option (if policy allows)

B. Book Ride Form

Fields:

- Pickup location
- Dropoff location
- Pickup time (now/later)
- Number of passengers
- Ride type (private/shared)
- Notes
- Preferred driver gender (optional)
- Cash / wallet / card

C. Ride Price Estimate

- Base fare
- Distance fee
- Time fee

- Peak multiplier (optional)
- Promo/discount
- Points earn / redeem preview

D. Confirm Ride Page

- Pickup map
- Driver ETA (if assigned)
- Fare
- Cancellation terms
- Payment method

E. Live Ride Status Page

Statuses:

- Requested
- Driver assigned
- Driver en route
- Arrived
- Trip in progress
- Completed
- Cancelled

Include:

- Driver name/photo

- Car/bike details
- Plate number
- Chat/call shortcut
- SOS / support button
- Share trip status (optional later)

F. Schedule Ride Page

- Date
- Time
- Recurring ride (optional)
- Repeat days for daily commuting

G. My Rides

- Upcoming
- Ongoing
- Completed
- Cancelled
- Rebook button

H. Rate Driver

- Stars
- Safety
- Cleanliness

- Punctuality
- Notes
- Complaint option

---

7. Delivery Module

This should cover both:

- **Food / meal delivery**
- **Parcel / item pickup & drop**
- **Store delivery**

Student Delivery Pages

A. Delivery Landing Page

Options:

- Order food
- Send package
- Buy from store
- Pickup & drop
- Errand request (optional later)

B. Food / Store Delivery Browse

- Merchant list

- Categories
- Popular near me
- Deals
- Delivery fee
- ETA

C. Merchant / Store Page

- Menu/items
- Add-ons
- Prep time
- Minimum order
- Delivery fee
- Ratings
- Promotions
- Open/closed status

D. Item Details

- Photos
- Description
- Price
- Variant / size
- Add-ons
- Quantity

- Notes

E. Cart

- Items
- Subtotal
- Delivery fee
- Service fee
- Tax (if used)
- Promo code
- Points earned
- Points redeemed
- Final total

F. Checkout

Fields:

- Delivery address
- Contact number
- Delivery notes
- Payment method
- Scheduled delivery option
- No-contact option (optional)

G. Parcel Delivery Form

Fields:

- Sender name
- Receiver name
- Pickup address
- Dropoff address
- Pickup contact
- Receiver contact
- Item description
- Fragile? yes/no
- Size / weight
- Cash collection? (optional later)
- Notes

H. Delivery Tracking Page

Statuses:

- Order placed
- Merchant accepted
- Rider assigned
- Picked up
- On the way
- Delivered
- Failed / cancelled

I. My Orders

- Food
- Parcel
- Store orders
- Current and past

J. Reorder Page

- Repeat old order quickly

---

8. Local Deals & Services Module

This is a marketplace for local student-relevant businesses.

Categories can include:

- Restaurants
- Cafes
- Printing
- Laundry
- Barbers / salons
- Gyms
- Clinics
- Study spaces
- Electronics repair

- Groceries
- Pharmacies
- Stationery
- Tutoring/services

Student Pages

A. Deals Landing Page

- Featured offers
- Student-only discounts
- Nearby merchants
- Category tiles

B. Deals Search / Category Listing

Filters:

- Category
- Distance
- Discount %
- Rating
- Open now
- Verified only

C. Deal Details

- Offer title

- Original price
- Discounted price
- Validity dates
- Terms
- Merchant info
- Branches
- Redeem options:
    - Show QR
    - Use promo code
    - Order now
    - Book now

D. Merchant Page

- About
- Branches
- Services
- Photos
- Operating hours
- Ratings
- Contact
- Current offers

E. Redeem Deal Page

- Confirm redemption
- Apply points if allowed
- Terms acceptance

F. My Saved Deals

- Wishlist

G. My Redemptions

- Used deals
- Active deals
- Expired deals

---

9. Meals Module

This should be separate from generic delivery because meals can include structured plans.

Student Meal Pages

A. Meals Landing Page

- Daily meal offers
- Meal plans
- Budget meals
- Healthy meals
- Bulk student plans

- Subscription meals

B. Meal Categories

- Breakfast
- Lunch
- Dinner
- Snacks
- Healthy
- High-protein
- Budget/student value meals

C. Meal Plan Page

Types:

- Daily plan
- Weekly plan
- Monthly meal subscription

D. Meal Plan Details

- Meals included
- Price
- Delivery days
- Exclusions
- Pause/skip policy

- Area coverage
- Provider details

E. Subscribe to Meal Plan Form

Fields:

- Start date
- Duration
- Meal preference
- Allergies
- Delivery address
- Preferred time window
- Notes

F. One-Time Meal Order

Like normal food ordering flow.

G. My Meal Subscriptions

- Active
- Upcoming
- Paused
- Cancelled
- Renewal options

H. Skip / Pause Subscription Page

- Reason
- Pause dates
- Resume date

---

10. Student Hub Module

This is the community / engagement layer.

It should include:

- Peer support
- Announcements
- Communities
- Help & tips
- Social engagement
- Student-focused content

Student Hub Pages

A. Hub Home

- Feed of posts
- Announcements
- Polls
- Tips

- Events
- Roommate requests
- Lost & found
- Campus updates
- UniZy content

B. Community Categories

Examples:

- Housing help
- Ride share
- Buy/sell
- Study help
- Events
- New students
- Recommendations
- Lost & found

C. Post Details

- Text
- Images
- Tags
- Comments
- Reactions

- Report post

D. Create Post Form

Fields:

- Post category
- Title
- Content
- Images
- Anonymous? (optional)
- Location tag
- Contact preference
- Rules acknowledgment

E. Comments

- Reply
- Mention
- Report abuse

F. Events / Announcements Page

- UniZy updates
- Promotions
- Student events
- Campus notices

G. Polls Page

- Simple student engagement polls

H. Lost & Found Form

Fields:

- Item name
- Lost or found
- Area
- Date
- Description
- Photo
- Contact method

I. Roommate Finder Form

Fields:

- Budget
- Area
- Gender
- Smoking preference
- Sleep schedule
- Cleanliness
- Study habits

- Move-in date
- Notes

J. Hub Moderation Rules Page

- Allowed content
- Safety
- No scams
- No harassment
- No off-platform abuse

---

11. Rewards / Wallet / Loyalty

You specified:

Every 1 Egyptian Pound paid = 0.1 point

So:

- 10 EGP = 1 point
- 100 EGP = 10 points
- 1,000 EGP = 100 points

This must be system-wide and automatic.

Student Rewards Pages

A. Rewards Dashboard

Show:

- Current points
- Total earned
- Total redeemed
- Pending points
- Tier level (if used)
- Expiring points
- Referral bonuses

B. Wallet Page

If UniZy wallet is enabled:

- Balance
- Top-up
- Refund credit
- Promo balance
- Points summary

C. Points History

- Earned from order
- Redeemed on order
- Referral bonus
- Adjustment
- Expired points

- Admin bonus

D. Redeem Rewards Page

Ways to redeem:

- Discount on next order
- Free delivery
- Deal vouchers
- Cashback credit
- Special student perks

E. Rewards Rules Page

Must clearly explain:

- Earning rule
- Redemption rule
- Minimum redeem threshold
- Expiry policy
- Fraud / cancellation policy
- Excluded transactions

F. Referral Program Page

- Personal referral code
- Invite friends
- Reward conditions

- Track successful invites

---

12. Orders / Requests / Bookings Center

This is essential and often forgotten.

The student needs **one unified center** for all activity.

Pages

A. My Activity Dashboard

Tabs:

- Housing requests
- Ride bookings
- Delivery orders
- Deals redemptions
- Meal subscriptions
- Support tickets

B. Status Details Page

Every request/order should show:

- Current status
- Timeline
- Assigned provider/driver

- Payment status
- Rewards earned
- Support shortcut
- Cancel / rebook / reorder / rate

C. Receipts / Invoices Page

- Downloadable receipts
- Paid/unpaid
- Refund status

---

13. Messages / Notifications

Messaging Pages

A. Notifications Center

Types:

- Order updates
- Driver assigned
- Offer alerts
- Rewards updates
- Account alerts
- Support updates

- Hub replies/comments

B. In-App Chat

Possible chat types:

- Student ↔ Support
- Student ↔ Driver
- Student ↔ Merchant
- Student ↔ Housing provider
- Admin relay mode if direct contact is restricted

C. Announcement Broadcasts

- Promotions
- Campus area alerts
- Service downtime
- Emergency notices

D. Notification Preferences

- Push
- SMS
- WhatsApp
- Email
- In-app only

---

14. Support System

Student Support Pages

A. Help Center

- FAQs
- Service guides
- Safety tips
- How rewards work
- How refunds work

B. Submit Ticket Form

Fields:

- Category
- Related service
- Related order/request
- Subject
- Description
- Attachments
- Urgency

C. Ticket Status Page

- Open
- In progress

- Waiting for customer
- Resolved
- Escalated

D. Live Chat / Contact Support

- Quick chat
- Callback request
- Emergency service issue shortcut

E. Report Problem Forms

Separate quick flows for:

- Fraud/scam
- Unsafe driver
- Misleading listing
- Missing order
- Wrong charge
- Bad provider behavior
- Hub abuse / harassment

---

15. Account & Settings

Pages

- Personal details
- Saved addresses
- Saved payment methods
- Language
- Notification preferences
- Privacy settings
- Security
- Change password
- Delete account request
- Logout
- Legal pages:
    - Terms
    - Privacy policy
    - Refund policy
    - Community guidelines
    - Rewards terms

---

16. Driver / Rider Panel

This needs its own app view or portal.

Driver Pages

A. Driver Login

- Phone/email
- Password/OTP

B. Driver Onboarding

Fields:

- Full name
- National ID
- License details
- Vehicle type
- Vehicle plate
- Vehicle photo
- Insurance docs
- Availability area
- Bank/wallet payout info
- Emergency contact

C. Driver Dashboard

- Online/offline toggle
- New job requests
- Active tasks
- Earnings today

- Ratings
- Wallet balance
- Incentives / bonuses

D. Job Request Details

- Pickup
- Dropoff
- Fare
- Customer notes
- Service type
- Accept / decline timer

E. Active Trip / Delivery Page

- Navigation shortcut
- Customer contact
- Status update buttons
- Problem report
- Proof of delivery upload if needed

F. Driver Earnings Page

- Daily
- Weekly
- Monthly

- Completed jobs
- Tips
- Bonuses
- Deductions
- Pending payout

G. Incentives Page

Examples:

- Order volume bonus
- Peak hour bonus
- Referral bonus
- Streak rewards

H. Driver Ratings & Feedback

- Customer reviews
- Complaint history
- Quality score

I. Driver Schedule / Availability

- Working hours
- Preferred zones
- Temporary pause

J. Driver Support

- Dispute fare
- Report customer issue
- Accident/problem report

---

17. Housing Provider Panel

Pages

A. Provider Onboarding

Fields:

- Full name / company
- ID / business docs
- Contact info
- Property ownership/authorization
- Payment payout details

B. Provider Dashboard

- Total listings
- Active requests
- Upcoming viewings
- Lead count
- Conversion count

- Earnings / fees due

C. Add Listing Form

Fields:

- Listing title
- Property type
- Address
- Area
- Map pin
- Price
- Deposit
- Room options
- Amenities
- Gender restrictions
- Availability date
- Photos
- Description
- Rules
- Contact method

D. Edit Listing

- Update availability
- Price

- Photos
- Details

E. Leads / Requests Management

- Viewing requests
- Booking interest
- Message history
- Accept/decline
- Mark rented

F. Provider Reviews

- Ratings
- Complaints
- Resolution requests

---

18. Merchant / Service Provider Panel

For stores, cafes, laundry, printing, etc.

Pages

A. Merchant Onboarding

- Business name
- Owner

- Category
- Branches
- Phone
- License/verification docs
- Delivery capability
- Payout details

B. Merchant Dashboard

- Orders today
- Revenue
- Pending orders
- Reviews
- Active deals
- Top items

C. Menu / Service Management

- Add products/services
- Edit pricing
- Availability
- Variants
- Inventory/out of stock
- Prep time

D. Deals Management

- Create offer
- Discount type
- Validity
- Conditions
- Max redemptions

E. Orders Management

- Accept
- Reject
- Ready for pickup
- Completed
- Refund/dispute flags

F. Branch Management

- Multiple locations
- Hours
- Service zones

G. Analytics

- Sales
- Best sellers
- Conversion
- Repeat customers

---

19. Meals Partner Panel

This can be separate or part of merchant panel.

Pages

- Meal plan creation
- Delivery day setup
- Subscription management
- Pause requests
- Dietary tags
- Capacity control
- Subscription revenue
- Meal feedback reports

---

20. Admin Panel

This is the real business engine.

A. Admin Dashboard

Must show:

- Total users
- Active users

- Orders today
- Housing leads
- Active drivers
- Revenue
- Commission
- Ticket count
- Failed orders
- Fraud alerts
- Reward liability
- Merchant/provider performance

B. User Management

- Students
- Drivers
- Housing providers
- Merchants
- Support agents
- Admins
- Suspend/verify/reset access

C. Verification Center

- Student verification

- Driver documents
- Provider documents
- Merchant approvals
- Listing moderation

D. Service Operations

Separate views for:

- Housing requests queue
- Transport dispatch queue
- Delivery order queue
- Deals redemptions
- Meal subscriptions queue

E. Dispatch Panel

- Assign driver manually
- Reassign jobs
- Area balancing
- Priority jobs
- Delayed order handling

F. Listing Management

- Approve/reject housing listings

- Approve merchants
- Moderate photos/content
- Flag suspicious entries

G. Pricing & Commission Engine

Set and manage:

- Transport fares
- Delivery fees
- Service charges
- Housing brokerage fee
- Merchant commission
- Driver payout rules
- Surge logic (optional)
- Promo budgets

H. Rewards System Management

- Points earning rules
- Redemption rate
- Referral rewards
- Manual point adjustments
- Expiry settings
- Abuse detection

I. Promo / Coupon Management

- Create promo codes
- First-order promo
- Student segment offers
- Merchant-specific offers
- Expiry, cap, budget

J. Content / CMS

- Home banners
- Featured offers
- Blog/help content
- Announcements
- Hub announcements
- Onboarding slides

K. Support / Tickets Center

- All tickets
- Assignment
- SLA tracking
- Escalation
- Refund approval
- Complaint resolution

L. Community Moderation

- Reported posts
- Flagged comments
- User bans
- Content removal
- Sensitive keyword monitoring

M. Financial Center

- Revenue
- Commission reports
- Payouts due
- Refunds
- Settlement reports
- Wallet balances
- Rewards liabilities

N. Reports & Analytics

- User growth
- Retention
- Order trends
- Service popularity
- CAC / referral performance

- Merchant performance
- Driver performance
- Area demand heatmaps
- Complaint analysis
- Failed order reasons

O. Notification Center

- Broadcast push notifications
- Segment users
- Trigger campaigns
- Service outage alerts

P. Audit Logs

- Admin actions
- Financial adjustments
- Refund changes
- Reward edits
- User suspensions

Q. Roles & Permissions

- Super admin
- Ops admin

- Finance admin
- Support agent
- Moderator
- Dispatch agent
- Marketing admin

---

21. Hidden But Essential Systems

These are the parts many founders forget but are required.

A. Payments System

Support:

- Cash on delivery
- Cash ride payment
- Wallet credit
- Card/online payment (later)
- Refund handling
- Failed payment reconciliation

B. Commission Engine

Needed to calculate:

- UniZy share

- Driver share
- Merchant payout
- Housing referral fee
- Promo subsidy

C. Settlement / Payout System

Must track what UniZy owes:

- Drivers
- Merchants
- Housing providers
- Meal partners
- Referral partners

D. Refunds / Adjustments System

- Partial refunds
- Full refunds
- Wallet credit refunds
- Reward reversal on refunds/cancellations

E. Fraud / Abuse Prevention

- Duplicate accounts
- Fake orders

- Fake referrals
- Fake listings
- Coupon abuse
- Reward exploitation
- Suspicious cancellations

F. Rating & Trust System

A trust layer should score:

- Drivers
- Merchants
- Housing providers
- Listings
- Students (internal service reliability score, optional)

G. Geo / Zone Management

Define:

- Service areas
- Delivery radius
- Driver zones
- Campus hotspots
- Pricing zones

H. SLA Rules

Operational time standards for:

- Order acceptance
- Driver assignment
- Support response
- Listing approval
- Refund processing

I. Analytics & Event Tracking

Track every major action:

- Signup
- Search
- Click listing
- Add to cart
- Checkout
- Booking
- Cancellation
- Referral
- Redemption
- Repeat purchase

J. Safety Layer

- SOS support button in ride flow

- Report unsafe behavior
- Emergency contact access
- Driver/provider verification badges

---

22. All Key Forms Needed

These are the forms you should expect to exist system-wide:

- Student sign up
- Student profile setup
- Saved address form
- Housing search preferences
- Housing viewing request
- Housing booking interest
- Housing review
- Ride booking
- Ride schedule
- Driver rating
- Food order checkout
- Parcel delivery request
- Merchant item review
- Deal redemption

- Merchant contact
- Meal plan subscription
- Meal pause/skip
- Hub create post
- Hub comment
- Lost & found submission
- Roommate finder
- Support ticket
- Fraud/safety report
- Referral submission/invite
- Driver onboarding
- Driver document upload
- Driver problem report
- Housing provider onboarding
- Housing listing creation
- Merchant onboarding
- Product/service creation
- Deal creation
- Meal plan creation
- Admin promo creation
- Admin reward rule setup
- Admin refund approval

- Admin broadcast notification

---

23. Business Rules You Should Lock Early

To reduce rework later, decide these early:

Rewards

- 1 EGP = 0.1 point
- Minimum redeem threshold
- Maximum % of order payable by points
- Do points expire?
- Are cancelled/refunded orders reversed?

Payments

- Which services allow COD?
- Which require prepayment?
- Can wallet + cash mix?

Cancellations

- When is cancellation free?
- Who pays for failed delivery?
- Driver compensation on cancelled jobs?

Housing

- Is UniZy just lead generation, or does it handle booking deposits?
- Does UniZy verify listings physically or document-only?
- Are listing fees charged?

Transport

- Is pricing fixed, distance-based, or admin-controlled?
- Can riders see exact driver contact info?

Delivery

- Is merchant inventory synced or manual?
- Are store orders instant or request-based?

Hub

- Anonymous posts allowed or not?
- Direct contact allowed or masked?
- What content is banned?

---

24. Recommended Navigation Structure

Bottom Navigation for Student App

Best main tabs:

- **Home**
- **Services**
- **Hub**
- **Activity**
- **Account**

Inside **Services**, show:

- Housing
- Transport
- Delivery
- Deals
- Meals
- Rewards

---

25. Recommended MVP vs Full Version

True MVP

If you want a launchable first version:

- Auth
- Home
- Housing listings + request

- Ride booking
- Delivery ordering
- Deals browsing
- Meals basic ordering
- Rewards tracking
- Basic admin
- Driver panel
- Merchant panel
- Support tickets
- Notifications

Full Version

Adds:

- Meal subscriptions
- Hub community posting
- Referral engine
- Wallet
- Advanced analytics
- Moderation tools
- Payout engine
- Fraud prevention rules
- Multi-role permissions

- Campaign management
- Zone-based operations

---

26. Best Database Entity Groups

At a high level, your system will need tables/entities for:

- Users
- Roles
- Student profiles
- Addresses
- Universities / faculties
- Housing listings
- Housing amenities
- Housing requests
- Ride bookings
- Driver profiles
- Vehicles
- Delivery orders
- Parcel requests
- Merchants
- Merchant branches

- Products / menu items
- Deals / offers
- Meal plans
- Meal subscriptions
- Orders
- Payments
- Wallet transactions
- Reward transactions
- Coupons
- Referrals
- Notifications
- Messages / chats
- Tickets
- Reviews
- Reports / abuse flags
- Zones / service areas
- Payouts / settlements
- Admin logs

---

27. Launch Readiness Checklist

Before building, make sure you define:

- Brand tone and UI identity
- Student verification rules
- Commission model
- Rewards redemption formula
- Supported payment methods
- Priority service areas
- Support workflow
- Cancellation/refund policy
- Provider onboarding standards
- Community rules
- Which flows are manual vs automated at launch

---

28. What People Usually Miss But You Should Include

These should be in your plan now:

- Unified order/activity center
- Receipts/invoices
- Refund handling
- Reward reversal logic
- Provider verification workflow

- Driver document expiry tracking
- Admin audit logs
- Community moderation
- Search/filter system
- Saved items/favorites
- Reorder/rebook actions
- Role-based permissions
- Notification preferences
- Emergency / safety reporting
- Payout and settlement reports
- Fraud/abuse flags
- Operational SLA dashboard

---

29. Final Recommended UniZy Scope Hierarchy

If you want this cleanly organized for design/dev, use this hierarchy:

Layer 1: Customer Experience

- Onboarding
- Home
- Core services

- Rewards
- Support
- Account

Layer 2: Transaction Engine

- Orders
- Bookings
- Payments
- Status tracking
- Refunds
- Settlements

Layer 3: Provider Ecosystem

- Drivers
- Housing providers
- Merchants
- Meal partners

Layer 4: Operations

- Dispatch
- Verification
- Moderation
- Pricing

- Support

Layer 5: Growth

- Referrals
- Promotions
- Rewards
- Engagement
- Student Hub

Layer 6: Intelligence / Control

- Analytics
- Fraud controls
- Audit logs
- Role permissions
- Zone management

---

30. My Straight Recommendation

For UniZy, the cleanest long-term product structure is:

- **One student app**
- **One provider app/portal** with role-based views
- **One admin dashboard**

- Shared backend with modular services

That avoids building too many disconnected systems.

If you want, I can next turn this into one of these formats:

1. **Exact app sitemap**
2. **Exact database tables (ERD-style list)**
3. **Full feature priority list (Phase 1 / 2 / 3)**
4. **UI page-by-page wireframe outline**
5. **Operational workflow map from request to completion**
6. **Monetization model for each UniZy service**

The best next step is for me to convert this into a **development-ready structured specification**.
